2021 Window + Door Award Winners Announced

VIENNA, VA, Dec. 15, 2021—Window + Door magazine announces the winners of the 2021 Window + Door Awards. The awards program recognizes the best products in the residential fenestration industry.

“We are proud to honor this year’s products after suspending last year’s program in the midst of the COVID-19 pandemic,” says Laurie Cowin, editor, Window + Door magazine. “Our judges carefully reviewed each entry to select winners that truly exemplify excellence in the residential fenestration industry.”

All manufacturers of residential windows and doors, as well as component and equipment suppliers, are eligible to be nominated for a Window + Door Award. A panel of judges representing all segments of the residential fenestration industry reviewed nominations and selected winners based on a specific set of criteria for each category. Judges cast their ballots for the products, processes, programs and machines they deem to have a substantial impact on the advancement of the industry.

The winners will be featured in Window + Door Weekly, on WindowandDoor.com and across Window + Door’s social media platforms.
